

Jose Guilherme Campos

Software Developer

Location: Ribeirão Preto, São Paulo, Brazil | **Phone:** +55 16 988020195 | **Email:** zecampos2015@yahoo.com.br

LinkedIn: [linkedin.com/in/jose-campos-dev](https://www.linkedin.com/in/jose-campos-dev)

SUMMARY

Software developer with over 9 years of experience in Front-End, Mobile, and API development. Proven ability to JavaScript, TypeScript, Python, SwiftUI. Expertise in Reactjs, Angular, VueJS, React Native, FastAPI, Nodejs, Nestjs, NextJS, ExpressJS, Adonisjs, ORM(Mongoose, Prisma, Sequelize).

I have in-depth experience with startup and software house environments, along with strong technical skills in mobile and web development. I build and publish iOS and Android applications on their respective stores and am proficient in creating robust web applications, deploying them on platforms like Digital Ocean, Heroku, Vercel, and Netlify. My expertise extends to API development and deployment on VPS providers such as Linode, GCP, Azure, and AWS. I handle full server configuration on Ubuntu, utilizing PM2, Nginx, and Nginx Proxy Manager, and set up deployment automation pipelines for streamlined, scalable operations.

SKILLS

Proficient: JavaScript, TypeScript, Node.js, Reactjs, React native, MySQL, Postgres, and MongoDB

Intermediate: Python, SwiftUI, Docker, DevOps

Beginner: Machine Learning, Deep Learning, Terraform, Pipeline, CI/CD

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Swift, Kotlin, SQL, and Go

Frameworks & Libraries: Nestjs, Nextjs, SwiftUI, Jetpack Compose, FastAPI, Django, React, [Node.js](https://nodejs.org/).

Databases: PostgreSQL, MongoDB, Qdrant (Vector Database), Redis

AI/ML: Google Gemini API, Ollama, RAG Systems, Vector Embeddings, Semantic Search

DevOps & Tools: Docker, Docker Swarm, Git, Poetry, Pytest, Alembic, Traefik

Cloud & Deployment: Railway, Render, Google Cloud, AWS, Supabase

PROFESSIONAL EXPERIENCE

Freelance Developer | AI Document Chat System | 2024 - Present

- Designed and developed a complete AI-powered document chat API from concept to production
- Implemented advanced features including document processing, semantic search, and AI integration
- Deployed and maintained production system serving multiple users with 99.9% uptime
- Technologies: Python, FastAPI, PostgreSQL, Qdrant, Docker, Google Gemini API

EnglishCraft - IPA Learning Platform | TypeScript, NestJS, React Native, PostgreSQL, Expo and Python | 2024 - Present

Url: <https://englishcraft.pro>

- Developed a comprehensive English learning platform featuring IPA (International Phonetic Alphabet) pronunciation tools, interactive flashcards, and a freemium subscription system
- Built scalable REST API using NestJS with TypeORM, implementing JWT authentication, role-based access control, and comprehensive data validation
- Created cross-platform mobile app (iOS/Android/Web) using React Native with Expo, featuring real-time

pronunciation feedback and spaced repetition learning algorithms

- Implemented freemium business model with usage limits, subscription management, and premium feature gating using custom guards and middleware
- Designed PostgreSQL database schema with optimized queries, implemented TypeORM migrations, and integrated with external pronunciation APIs
- Deployed full-stack application using Docker containers, Nginx reverse proxy, and automated CI/CD pipelines for production environments
- Technologies: TypeScript, NestJS, React Native, Expo, PostgreSQL, TypeORM, JWT, Docker, Nginx, Jest, ESLint
- Integrated Python microservices for advanced text processing and pronunciation analysis using FastAPI and async/await patterns
- Implemented Python-based NLP pipelines for phonetic transcription and language learning analytics

Mobile Developer

Ília, Brasília, BR – Remote

02/2022 To 12/2025

Core Responsibilities:

- Developed the Banco do Brasil Insurance mobile application using React Native, achieving a significant increase in the sale of new insurance
- I am fixing the application components to improve the user experience and attract more users into the insurance center.
- Develop microservices in go and Node Js to integrate with whatsapp (meta api). this service was developed so that the sales team can offer the product to the user via whatsapp.

Key Technologies and Tools: React Native, Reactjs, Nodejs, Go, GitLab, Xcode, Typescript, Android Studio, Jest, Unit Test and Jira.

Software Developer

Celler, São Paulo, BR – Remote

07/2021 to 01/2022

Core Responsibilities:

- I developed the Celer bank application with react native and increased the exposure of the banking services offered by fintech.
- Develop the API using Node Js with Azure functions and make the service available to support thousands of requests.
- Develop the API using Go to integrate with partner systems, as a result, integrations became faster and less prone to errors.
- I developed security layers in the API using Node Js to prevent cyber attacks such as man-in-the-middle (MITM), preventing the bank from suffering major losses due to fraud.

Key Technologies and Tools: React Native, NodeJS, GO, Azure, Xcode, Android Studio, Unit Tests and MongoDB.

Software Developer

WT9, São Paulo, BR – Remote

01/2021 to 07/2021

Core Responsibilities:

- I developed applications in React Native for companies to test their MVPs, as a result, they validated their ideas and value propositions.
- I developed SPAs in Reactjs and Angular for companies to test their MVPs, as a result, they validated their ideas and value propositions.
- Develop APIs with NodeJs and Django for companies to test their MVPs, as a result, they validated their ideas and value propositions.

Key Technologies and Tools: React Native, Angular, Vuejs, Django, GitLab, Xcode, Typescript, Android Studio, Jest, Unit Test and Jira.

Software Developer

Nama, São Paulo, BR – Remote

08/2020 to 01/2021

Core Responsibilities:

- I developed chatbots for large companies in the markets such as Americanas and Canon stores, these chatbots streamlined customer service and improved consumer relationships.
- I Developed an API with Ruby on Rails to integrate our client's services.

Key Technologies and Tools: AIML, Reactjs, Ruby on Rails, Unit Test and Jira.

Software Developer

DuoDev, São Paulo, BR – Remote

12//2018 to 07/2021

Core Responsibilities:

- I developed applications in React Native for companies to test their MVPs, as a result, they validated their ideas and value propositions.
- I developed SPAs in Reactjs and Angular for companies to test their MVPs, as a result, they validated their ideas and value propositions.
- Develop APIs with Node Js for companies to test their MVPs, as a result, they validated their ideas and value propositions.

Key Technologies and Tools: React Native, Angular, Vuejs, GitLab, Xcode, Typescript, Android Studio, Jest, Unit Test and Jira.

Software Developer

PagPop, Ribeirão Preto, BR

09//2017 to 12/2018

Core Responsibilities:

- I developed applications in React Native for this fintech.
- I developed SPAs in Reactjs and Vuejs to provide access to customers via the web, customers can access bank account statements and other transactions.

Key Technologies and Tools: React Native, ReactJS, Vue.js, Git, Xcode, TypeScript, Android Studio, Jest, Unit Tests, and Jira.

PROJECTS

AI-Powered Document Chat API | Python, FastAPI, PostgreSQL, Qdrant, Google Gemini

- Developed a comprehensive REST API for private document chat using AI, featuring document upload (PDF, DOCX, audio), text extraction, and semantic search capabilities
- Implemented RAG (Retrieval-Augmented Generation) system with hybrid search using dense and sparse vectors for improved accuracy
- Built an authentication system with JWT tokens, user management, and role-based access control
- Integrated multiple AI providers (Google Gemini, Ollama) with fallback mechanisms for high availability
- Deployed production-ready application using Docker Swarm, Traefik load balancer, and automated SSL certificates
- Technologies: FastAPI, SQLAlchemy, PostgreSQL, Qdrant Vector DB, Docker, Poetry, Pytest, Alembic

EDUCATION

Bachelor of Business Administration

Centro Universitário Moura Lacerda, São Paulo, Brazil

02/2008 to 12/2012

Bachelor of Systems Analysis and Development

Estácio, São Paulo, Brazil

06/2016

CERTIFICATIONS & COURSES

- FastAPI Development Course - Dunossauro (2024)
- AI/ML Integration with Python APIs
- Vector Database Implementation (Qdrant)
- Docker & Container Orchestration

LANGUAGES

Portuguese: Native

English: B2
